Centre for AI in Health - Application for Workshop Participation

Applications from employees at the Faculty of Medicine, Aalborg University are welcome. Other interested from the healthcare sector are encouraged to find collaborators at the Faculty of Medicine.

The Centre for AI in Health (AI in Health) is a strategic initiative at AAU SUND aimed at advancing research and strengthening community building within AI-assisted healthcare.

The Centre focuses on developing and implementing usable, trustworthy, and interpretable AI-based solutions within three core focus areas:

1. AI for disease prevention
2. The AI-driven hospital
3. AI support for cross-sector healthcare

The Centre invites expressions of interest for participation in an upcoming workshop. The workshop will bring together researchers to contribute to shaping the Centre's future activities, including the development of ambitious use cases and shared capacity within AI in Health at AAU SUND.

The workshop will take place on **29–30 September 2026 at Comwell Rebild Bakker.**

A number of participants are already confirmed, including members of the steering committee, centre management, selected use case contributors, and invited participants. The total number of participants is limited to approximately 80. If the number of applicants exceeds available places, applications will be assessed by the steering group. Each application will be evaluated by members of the steering committee based on:

- the strength of the applicant's interest in applying AI within healthcare
- the relevance of the applicant's experience in relation to the Centre's purpose
- the applicant's potential to contribute to the Centre's activities

Assessments will be based on a 5-point Likert scale (1 = low, 5 = high). Individual scores will be reviewed and discussed by the steering committee before final selections are made based on the overall assessment. Applicants will be notified of the outcome after 6 July 2026.

Please complete the form below to apply for participation in the workshop. Apply before 28 June 2026.

Application Questions

7. Please describe your interest in applying AI within healthcare.

You may include any relevant activities, projects, initiatives, or collaborations you have been involved in. *(max. 1000 characters)* *

Indtast højst 1000 tegn

8. Please describe your background and experience relevant to the Centre's focus areas.

You may include research, clinical, technical, or interdisciplinary experience. *(max. 1000 characters)* *

Indtast højst 1000 tegn

9. Please describe how you would be able to contribute to the Centre's objectives, the development of use cases, and the workshop.

You may describe your potential contribution and how you would add value to for example methodology, data and infrastructure, implementation, and the workshop. *(max. 1000 characters)* *

Indtast højst 1000 tegn

10. What expertise do you bring? (select all that apply) *

- Clinical practice
- Data science and AI
- Software engineering
- Governance and ethics
- Other

11. If you have chosen 'Other', please elaborate

Indtast højst 300 tegn

12. **Where would you like to contribute?** *(select all that apply)* *

- Developing AI use cases
- Building data and technical infrastructure
- Developing methodologies
- Clinical implementation and validation
- Other

13. If you have chosen 'Other', please elaborate

Indtast højst 300 tegn
