Other participants: Click to add any other participants / administration officers. Please note during which items they participate. Also remember to note who is doing the summary.

Ad 1. Starting to study / starting the semester

Semester start

- No comments

Follow-up:

NA

Ad 2 The physical, esthetic, digital and mental study environment of the semester

- No comments

Follow-up:

NA

Ad 3. Semester activities

Status seminar:

- Remember the status seminar, there will be a program for BM and TM and one for MMA. Remember to join, it is important.

Follow-up:

NA

Ad 4. Preliminary evaluation of the course modules and activities

Disease Processes and Diagnostics – Personalized Medicine (BM):

- Works well how it is organized, and the students likes the teaching style.

Regenerative Medicine (BM):

- Not enough courses to say anything yet, exam is a bit confusing, because its more open. The students are encouraged to discuss this with the module coordinator.

Immuno- and Molecular Therapy (BM/TM):

- Need more time when the students have to do presentations, not enough time to put together something reasonable.

Translational Research Principles (TM):

- The lab workshops are great, but there are a lot of last-minute changes.
- The semester coordinator contacted the module coordinator after the meeting. One lecture was rescheduled from physical to online (but the time was not changed) and one lecture was rescheduled, since only a single student showed up.

Advanced Statistics (TM/MMA):

- Slides of Jans PowerPoint, the interpretations of test are a bit lackluster, need better information to read the results of the test.
- There will be a workshop on April 14th, program will be out soon.

Decision-Analytic Modelling and Trial-Based Evaluation in Health Economics (MMA):

- No feedback, the course is running as it should.

Organization and Financing in Healthcare (MMA):

- No feedback, the course is running as it should.

Follow-up:

NA

Ad 5. Preliminary evaluation of the project module

Group 8000

- Have scheduled a supervisor meeting.

Group 8001

- Reached out but no answer from supervisor yet.

Group 8002

- They planned a meeting on Thursday (29 of February).

Group 8003

- They have done prelim research and have supervisor meeting Wednesday (28 of February).

Group 8004

- Not attending

Group 8005

- Have contact to supervisor.

Group 8006

- Not attending

Group 8007

- Not attending

Group 8008

- Schedules meeting and will start the project there after.

Group 8009

- Not attending

Group 8010

- Have had the first supervisor meeting and will fully start the project around April.

Follow-up:

NA

Ad 6. Introduction to the 9-10 semester

- Semester coordinator: Simone Riis Porsborg, sriis@hst.aau.dk
- There are two options for the final year but different requirements for the two options, information can be found in the curriculum online.
- Students should start looking for a project now, reach out to previous master students or supervisors. If students register now in STADS they will apply to a short master's thesis. To apply for the long thesis, students have to send application form to Dorthe and register in STADS around December.
- Simone has a flyer (on moodle) with information for potential supervisors and external collaborators on what it is like to have a master's students. This includes statistics from EU of the benefits of having a master's student.
 - Strengthening of their business.
 - Brought solutions for their problems.
- It is also possible to the master thesis abroad.
- Further questions for can be directed to Dorthe Skree (dsk@hst.aau.dk) or Simone Riis Porsborg (sriis@hst.aau.dk)

Questions:

- If you want to write with a specific company but do not have an entry to the company, find a professor from HST that has contact to the company.
- There are foundations for studying abroad, look at the Legathåndbog at the library, it is worth trying since some are easy to get. Potential options would be Oticon Foundation, Svend Andersen Foundation, or Velux Foundation.
