

SEFI 2028: July 3 - 6

**SAVE THE
DATE**

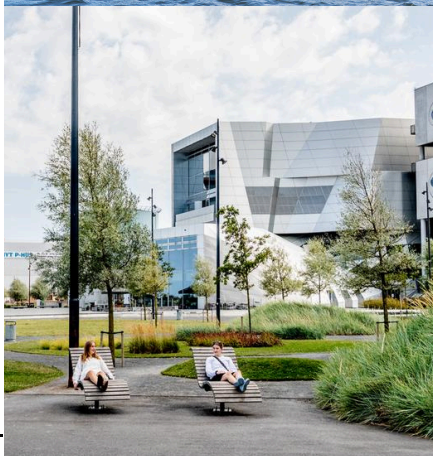

Aalborg University

We are delighted to welcome you to Denmark and to Aalborg for the SEFI Annual Conference 3-6th July 2028. Aalborg offers a unique blend of vibrant city life and a warm, welcoming atmosphere.

As the capital of North Jutland, Aalborg combines world-class architecture, culture, art and gastronomy with historic charm. Explore museums, cultural landmarks and picturesque cobbled streets, relax by the fjord, and enjoy the lively waterfront that brings the city together.

The conference will explore key themes within Engineering Education for Future Societies, reflecting Aalborg University's commitment to mission-driven innovation. These include sustainability, green transition, digitalisation and well-being, alongside a strong focus on human values, ethics and societal impact.

Delegates will experience Aalborg University's Problem-Based Learning model in action — connecting students, industry and communities to address real-world challenges.
