

### Studienævnets konklusion vedrørende evaluering af masteruddannelser

Uddannelse	MIT
Fagpakke	Data Science og Big Data
År	2024/2025
Dato	September 2025

Dette dokument udgør den offentligt tilgængelige evaluering af ovennævnte masteruddannelse. Dokumentet udgør sammen med evalueringsrapporten for ovennævnte masteruddannelse grundlaget for eventuelle justeringer, som bør foretages på baggrund af deltagernes evaluering.

Dokumentet udgør ligeledes studienævnets tilbagemelding til deltagerne og øvrige parter om de konklusioner, som nævnet har truffet på baggrund af deltagernes respons

### Fagpakke ansvarliges offentligt tilgængelige opsamling og anbefalinger

Overall, the individual courses and the fagpakke as a whole received a positive evaluation. Participants often find it challenging to allocate enough time for the courses while also being under pressure in their full-time jobs. A relatively high number of students were admitted to the fagpakke (or single courses) with dispensation from the general admission requirement of a Bachelor in an IT/Software related education. A single comment by one respondent points to an extra effort required by students without a strong IT background, but overall the responses (and the exam results) indicate that this fagpakke is well suited for interested participants from a wide spectrum of educational and professional backgrounds. Further improvements can be made by a better calibration of the amount of material covered (especially 2nd Enkeltfag), and improved coherence and transparency in the relationship between course/exercise contents and structure, and exam form and requirements. It must be noted, though, that no major criticisms about the latter aspects were received. However, a number of comments and suggestions point to room for improvement in that direction.

### Studienævnets konklusion

Generelt positiv feedback. Der kan opfordres til en bedre forventningsafstemning mellem deltagerne og deres arbejdsgiver for at have tid nok til at gennemgå stoffet.

Studienævnet har på sit møde på ovennævnte dato besluttet, at fagkoordinators samlede rapport og evalueringer af enkeltfagene sendes til de respektive undervisere. Den samlede evaluering fremsendes til IT-Vest sekretariatet.
