INTRODUCTION

AAU HORIZON EUROPE COMPENDIUM

Interested in finding academic partners for the upcoming Horizon Europe calls? At AAU, we have collected, mapped, and showcased AAU researchers' interest in collaborating on specific topics within the six clusters of Pillar 2 (including EU Missions & Cross-cutting activities). Each compendium displays our showcased researcher's relevant expertise within each identified topic, which makes it easy to locate AAU researchers who are interested in collaborating and providing their expertise in your next Horizon Europe proposal.

ABOUT AAU

AAU has campuses in Aalborg, Copenhagen, and Esbjerg, as well as an EU office in Brussels. We have 3.700 staff, 18.000 students and an annual turnover of DKK 3 billion.

AAU is a comprehensive university covering four faculties and 18 departments, such as Sustainability and Planning, Energy, Health Science and Technology, Computer Science, Built Environment, Politics and Society, Culture and Learning.

With problem-based learning at the heart of educational programs, AAU researchers and students are well-equipped to take on current and future societal, environmental and economic challenges.

OUR PROFILE AND DNA – WHY SHOULD YOU PARTNER WITH US?

Collaboration is heavily embedded in the DNA of AAU. We have a strong and natural collaboration with industry and the surrounding society – thus our current strategy is labeled “Knowledge for the World 2.0”.

We are a mission-oriented university, with three identified AAU Missions:

1. A Sustainable Danish Energy System
2. Improved Wellbeing Among Children and Youth in Denmark
3. Improving Health Through Coherence and Individualisation

As the second best ranked engineering university in Europe, and being no. 16 globally (ranking from the U.S. News & World Report), as well as being in top 5 of universities pursuing the UN sustainable development goals (THE University Impact Rating), we are a very capable partner and collaborator.

AAU has contributed as coordinator or partner in close to 200 projects in the EU Horizon 2020 Framework Programme. For Horizon Europe we have – so far – contributed to more than 150 projects. We are setting even more ambitious targets for Horizon Europe in 2025 and going forward.

DESTINATION 1

INNOVATIVE RESEARCH ON DEMOCRACY AND GOVERNANCE

DESTINATION 1: CALLS

CALL – INNOVATIVE RESEARCH ON DEMOCRACY AND GOVERNANCE

HORIZON-CL2-2025-01-DEMOCRACY-06: Countering and preventing
radicalisation, extremism, hate speech and polarisation (RIA)

HORIZON-CL2-2025-01-DEMOCRACY-13: Government in transition – how
governments change the way they work and prepare the civil service for the future
(RIA)

HORIZON-CL2-2025-01-DEMOCRACY-06: COUNTERING AND PREVENTING RADICALISATION, EXTREMISM, HATE SPEECH AND POLARISATION (RIA)

<https://vbn.aau.dk/da/persons/120308>

HIGHLIGHTED AAU RESEARCH GROUPS

I am head of the new research group RECAST (Research in sociocultural aspects of sustainability and green transitions). This interdisciplinary group provides new knowledge and understandings of sociocultural aspects of sustainability and green transitions. The current sustainability crises are co-constituted through human and social activities and therefore need to be explored through humanities and social science perspectives.

RELEVANT PROJECTS

Accordingly, I think I can contribute to all calls with my SSH profile, more specifically with my knowledge of the role of language, communication, interaction and practice in societal change. Furthermore, I have particular knowledge of normative barriers for change, and of public transport as a public space.

I have experience as a research group leader and as project PI, so I would have the appropriate experience for taking on the role as a work-package leader.

AREA OF EXPERTISE

My interdisciplinary profile spans from studies in Danish grammar to studies of governmentality and mobilities studies. Theoretically and methodologically my research is grounded in discourse approaches to communication. Topically, it has developed around the question of a green, equitable transition of everyday transport practices, and my current projects all concern public transport. I have recently closed a research project on the governing of appropriate 'travelling together', particularly in relation to the risk of contagion, and I am currently in the start-up phase of an Inge Lehmann-project that concerns identities and rationalities in public transport, and in August 2025 I will start one more DFF-project that concerns communicative accessibility in public transport for people with various invisible disabilities.
