

Health Research at Department of Chemistry and Bioscience

Goals:

- Causal Molecular Mechanisms
- Innovation
- Treatment
- Diagnosis
- Prevention

Read about us here <https://www.bio.aau.dk/> and find contact details on the back

Name	Research Interests	Contact
 Anders Olsen	<i>C. elegans</i> genetics Ageing Alzheimer's and Parkinson's diseases Gut-brain axis	ao@bio.aau.dk
 Peter Kristensen	Antibody based therapies and diagnostics Molecular engineering of antibodies: ➤ Cancer ➤ Infectious fungal infections ➤ Neurological disorders	pk@bio.aau.dk
 Malene Brohus	Cellular calcium signalling Protein interactions Cardiac and neurological disorders	mbrohus@bio.aau.dk
 Xinxin Xiao	Electrochemical biosensor Biomaterials	xixi@bio.aau.dk
 Reinhard Wimmer	NMR Spectroscopy Metabolomics Protein structure and function	Rw@bio.aau.dk
 Michael Toft Overgaard	Protein function in health and disease: - Cardiac arrhythmia - Hibernating bear physiology - Endometriosis	mto@bio.aau.dk
 Simon Gregersen Echers	Mass spectrometry-based proteomics Bioinformatics and artificial intelligence Bioactive peptides Protein/peptide structure/function	Sgr@bio.aau.dk
 Helene Halkjær Jensen	Cellular calcium signalling Cardiac and neurological disorders <i>C. elegans</i> and cell-based models Live imaging microscopy	hhj@bio.aau.dk
Torsten N. Kristensen	Drosophila models Aging Nutrition	tnk@bio.aau.dk
Mads Albertsen	Metagenomics, Metatranscriptomics, Phylogeny, Bacteria, Sequencing	ma@bio.aau.dk
Jeppe Lund Nielsen	Microbiome and gut health Metagenomics	jln@bio.aau.dk
