

## Study Board Follow-up on the Semester Evaluation F25

### IV6

#### Response Rate

82%

#### 1. Semester Coherence and Planning

- The students expressed differing opinions regarding holding exams in April. It was also challenging that some sessions in the Electrical Systems course were scheduled the day before the Energy exam.

**Follow-up:** There was general satisfaction with holding exams in April, as it provides better opportunity to focus on project work. Semester coordinators are encouraged to inform students of the structure at semester start. This point will be included in the semester start meeting.

#### 2. Project

- Praise for Lasse Schmidt and Mikkel van Binsbergen-Galán.

#### 3. Courses

- *Energy-Producing and Converting Systems:* The course is perceived as misplaced.

**Follow-up:** The course will be discussed at a coordination meeting with the different departments involved in the General Engineering programme.
