

Semester coordinator evaluation rapport for MedIS 4. Sem, master
Year: Spring semester, 2024 Semester coordinator/rapport completion date/: Simone Riis Porsborg/ 121124 Number of semester group meetings conducted during the semester: 2 Appendices attached: 0
Study program start
Starting the semester went well, the students found It easy to find the information needed before and during the semester start.
The semester in general
“Et sundt match” was highly appreciated. Especially the first part. The second part with presenting the student CV posters could maybe do with some adjustments, since some people didn’t get at visit from the company employees while others had several. An idea could be to have this section in different sessions/rotations, so not all students presented at once. This would also enable the students to visit each other. Perhaps some “how to” info for the company employees would also be good so they didn’t go around in groups but split up so they could visit more students.
Project module
77% have written a long thesis. The structure of the statusseminar was appreciated
Course modules
None
Action points/planned initiatives
<ul style="list-style-type: none">• Assign supervisors to MMA projects in advance of semester start• Information about rules for lab coats and gloves outside labs have been posted• Give more information about the workshop at semester start and make it physical.• Try to plan more activities at the same day• Give more reminders about activities• Ask for a receipt function when signing up for “Et sundt match” and another structure for the second part• Keep the structure of the status seminar
