

## Semester group meeting (1). 7. semester

October 12, 2020

---

### Participants:

Simone Riis, BM profile coordinator and semester coordinator

Anita Egholm Jensen MMA profile coordinator (substitute for Annette Willemoes)

Dorthe Skree, study secretary for MedIS master

9 students – MMA, TM and BM students.

**Minutes by:** Dorthe Skree

### BM/TM/MMA: Evaluation of courses

- **BM – Molecular pathogenesis**

No comments. BM students are satisfied with both teacher and course.

- **BM/TM -Molecular and cellular Methods in Biomedicine**

Especially TM students are frustrated. They would like a clear timeframe of the course and the assignment on Moodle.

The students find it difficult to prepare for the course when all teachers do not expect the same from the students.

- **TM – Designing and Evaluating Pharmacological Research**

Students are very satisfied with this course, and the teachers, who are very good and prepared.

- **BM/TM/MMA – Quality Improvement and Quality Assurance**

Students need a more specific introduction to the course. Especially TM and BM students do not understand what they can use the course for.

- **MMA – Methods of Economic Evaluation in Healthcare**

Students are very satisfied with this course, and the teacher, who is very good.

- **MMA – Marketing and Market access for Healthcare**

The teacher from Aarhus university is very good, but unfortunately not specialized into the pharmaceutical industry. The teaching is based on one specific book, and according to the teacher this is the book they will be examined in. The students find that this part of the course is missing an element of PBL.

The students are not sure of who is responsible for the course and the exam, because the module coordinator is on sick leave. The substitute informed the students who is responsible for the course at the moment.

Semester coordinator informed the students, that they can always contact her if there is anything they are unsure about.

Before the module coordinator went on sick leave she informed the students about the importance of attending the course, because there are missing books on the subject.

### **Messages form coordinator**

- Information on substitute for module coordinator for MMA who is on sick leave.
- Semester coordinator reminded the students, that they can always contact her if there is anything they are unsure off.

### **Projects**

- All groups have been formed
- Semester coordinator informed about the importance of PBL, and that a safety course is necessary for BM and TM students.
- MMA students were dissatisfied with the groups had to be formed already after 3 days of teaching, They would have preferred this in week 4.

### **Semester in general**

- MMA students are missing some teaching due to cancellation because a student had covid-19. The students were tired off that the teaching had been cancelled.
- Semester coordinator informed that the students can make agreements with other students in order to join online for the teaching.
- TM students told that their teacher had a microphone in the class for those students who cannot be present for teaching.
- Microphones can be borrowed at the office on NJV. 12-A%-118 (Medicine team)
- The students asked how the next case of covid-19 will be handled. Semester coordinator will contact the head of studies and ask, and ask all modul coordinators to have a plan B for both teaching and the exam. They will also be asked to inform the students about this plan.
- Semester coordinator reminded of COVID-19 precautions as distance requirements, disinfection etc.

### **A.O.B.**

- Nothing to discuss
